

# Safety Data Sheet QuickLink III, Fixative Revision Date 1/1/2020

# **1. PRODUCT AND COMPANY IDENTIFICATION**

Product name: Product code:	QuickLink III, Fixative 400150, 400160, 400170, 400171
Supplier:	EDM 3, LLC 3611 St Johns Bluff Road, Suite 1 Jacksonville, FL 32224 800-638-2625 Monday-Friday: 8:00 -5:00 PM
Synonym:	None.

Material uses: Laboratory Reagent. Revision date: 1/1/2020 In case of a medical emergency or a spill, call: INFOTRAC at 1-800-535-5053 (Domestic within the USA and Canada) or 1-352-323-3500 (International callers may call collect), 24

hours/day,

7 days/week.

# 2. HAZARDS IDENTIFICATION

2.2 GHS Label elements, including precautionary statements

Safety Word: Danger!

#### 2.1 Classification of the substance or mixture

#### Hazard statement(s):

H225: Highly flammable liquid and vapor (Cat 2).

- H315: Causes skin irritation (Cat 2)
- **H319:** Causes serious eye irritation (Cat 2/2A).
- H332: Harmful if inhaled (Cat 4).

#### **Precautionary statement(s):**

P210: Keep away from heat/sparks/open flames/hot surfaces. - No smoking.

**P260:** Do not breathe dust/ fume/ gas/ mist/ vapors/ spray.

P280: Wear protective gloves/ eye protection/ face protection.

**P305+351+338:** If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

#### 2.3 WHMIS Classification

B-2 Flammable Liquid

#### 2.4 NFPA Rating

Health hazard: 2 Fire: 3

Handling:

Storage:

Do not get in eyes, on skin or clothing. Do not breathe vapor or mist. Do not ingest. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use non-sparking tools. Take precautionary measures against electrostatic discharges. To avoid fire or explosion, dissipate static electricity during transfer by grounding and bonding containers and equipment before transferring material. Use empty containers to retain product, residue can be hazardous. Do not reuse container. Store in accordance with local regulations. Store in a segregated and approved area.. Store in original container, protected from direct sunlight. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage.

Engineering measures: Hygiene measures:	Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment. Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.
Personal protection Respiratory: Hands: Eyes: Skin: Environmental exposure	Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Recommended: neoprene Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists or dusts. Recommended: splash goggles Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. Recommended: lab coat
controls:	Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters

or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

# **10. STABILITY AND REACTIVITY**

Chemical stability:	The product is stable.
Possibility of hazardous	
reactions:	Under normal conditions of storage and use, hazardous reactions will not occur.
	Under normal conditions of storage and use, hazardous polymerization will not occur.
Conditions to avoid:	Avoid all possible sources of ignition (spark or flame). Do not pressurize, cut, weld, braze, solder,
	drill, grind or expose containers to heat or sources of ignition.
Materials to avoid:	Highly reactive or incompatible with the following materials: oxidizing materials. Reactive or
	incompatible with the following materials: metals and acids.
Hazardous decomposition	
products:	Under normal conditions of storage and use, hazardous decomposition products should

#### **Environmental Precautions:**

No known significant effects or critical hazardous. The products of degradation are less toxic than the product itself.

# **13. DISPOSAL CONSIDERATIONS**

The information presented only applies to the material as supplied. The identification based on characteristic(s) or listing may not apply if the material has been used or otherwise contaminated. It is the responsibility of the waste generator to determine the toxicity and physical properties of the material generated to determine the proper waste identification and disposal methods in compliance with applicable regulations. Disposal should be in accordance with applicable regional, national, local laws and regulations.
